HSSE & QA/QC System of the Company

Concept of Health & Professional Safety:

Health and Professional Safety is defined as the field aims to keep worker in safe preventing occurrence risks are accompanied with job or its circumstances through treating personal or technical factors may lead to these risks and then improving work environment and its circumstances keeping the physical and mental conditions of the staff good permanently.

Field of Professional Safety becomes self-standing science is emerged to put rules and regulations keeping the man health and life away from risks of injury, death and to keep assets away from damage or loss.

The Importance of Health and Professional Safety has important role in our daily life, especially inside worksite as it can be defined as set of preventive procedures and precaution measure are put to make work progress smoothly without no risk may obstacle implementing programs and plans.

The Objective of preparing Health and Professional Safety Plan.

Protection of the constituents of human and material production and providing the necessities making work environment safe and to reduce the cost of production and increase productivity; the issue for which, it should be by full cooperation among safety officers and those of executive sectors in different fields to secure best and required conditions to complete works without exposing to risks, accidents and injuries.

Priorities:

The utmost priorities of our company that safety is first.

The Board gives safety and health of work-staff the precede priority in its business and attempts to achieve that through:

- 1) Enhance regulations and measures contribute in protecting and keeping the health of work-staff, maintaining premises and environment.***
- 2) Enhance the awareness and express the prevention culture among work-staff and guests.***
- 3) Prepare and train work-staff to maintain their health and protect themselves.***
- 4) Treating any action may lead to safety and health of work-staff, guests, premises or environment.***
- 5) Evaluate risks continuously, put and apply solutions to treat risks.***

Responsibilities:

- 1) Site or Job Controller: He shall supervise execute and update plans, measures, requirements of health and professional safety in direct coordination with safety officer and to make reports available to the concerned authorities as he/she shall perform the following duties:***
 - Apply the required procedures to coordinate with HSSE Officer to secure protection of work-staff and guests inside worksite.***
 - Review probable risks may the work-staff expose to.***
 - Suspend works may form risk on the life of workers and apply relevant remedies and not to allow completing works unless obliging with safety standards.***
 - Continuous supervision and tracking the progress of the job ensuring apply health and professional safety standards.***

2) HSSE Officer:

- *He is the technical and administrative main officer for HSSE matters in worksite as he assume performing the following tasks:*
- *Developing, performing, reviewing and documenting safety statement.*
- *Make the periodical reports available for all administrations of the site on the extent of performing safety statement.*
- *Communicate with all staff to reveal the importance, objectives, roles, responsibilities, rights and duties of all works in regards to safety.*
- *Evaluation work risks and ensure applying control procedures.*
- *Put plans and apply it to prepare and train staff on working safely.*
- *Make emergency plans, saving and training staffs on.*
- *Ensure the availability of Personal protection Equipment are relevant for worksite.*
- *Manage and evaluate risks in the worksite prior to commence the job and to apply preventive measures to control it.*
- *Control and inspect work-staff and equipment and secure its suitability for the job.*

3) Responsibilities of Work-Staff:

Owing to the importance and role of work-staff, there are several tasks to be applied to contribute in enhancing safety of the work.

- *Oblige with regulations, procedures, instructions & requirements of the safety.*
- *Oblige to wear Personal Protection Equipment.*
- *Keep personal and staff safety together.*
- *Review risks the staff may expose to during the work with safety officer or supervisor or site manager and discuss protection prior to commence the job.*

- **Inform HSSE Officer, work observant for any breach or default in applying any safety procedures and requirements or safety situation in the site.**
- **Maintaining the environment in the worksite.**

First Aids Plan:

Accident may occur for any person at any time either at home or in the job site as first aids cover actions to be taken to assist injured period at first minutes.

Many times, these first aids may assist to improve and cure soonest and may rescue people as it is the first and utmost solution in many different situations. Thus, it is necessitated to make paramedic room available to provide medical and first aids to be administrated by expert has wide range of knowledge in this field. This room shall contain at least the following:

- 1) Bed with its accessories.**
- 2) Sphygmomanometer**
- 3) Painkillers**
- 4) Different medications.**
- 5) Injure Treatment Requirements in case of injury.**

Ambulance

Ambulance with its all requirements shall be made available at worksite with assigning trained person having wide range expertise in the medical field.

Emergency Plan

Emergency planning is not alternative for accrediting engineering preventive means and PPEs but a supplementary for it in case of any emergency accident.

The main aim of emergency plan inside worksite is to control accident and to prevent it spreading into premises are close or surrounding site and to lessen injuries at sites at least.

The requirements of plan success to face crises and emergencies depend mainly on crises administration team and the extent of its training on the how of detecting warns of crises and to take preventive actions & actual response, limiting the damage effect and on available means and equipment, guidebook arranging mode of implementation the plan.

Important point to be applied in case of emergency:

- 1. Calm and avoid interruption.***
- 2. Suspend the work instantly.***
- 3. Switch-off electricity.***
- 4. Evacuate untrained work-staff out of work site through main exit points or emergency exit points.***
- 5. Make relevant communication means available to call the assistance from the concerned authorities in case of emergencies.***
- 6. Not to take any risk may effect on your health or life and not to return back to the site whatsoever but upon getting permission from safety officer.***

What is the elements of Emergency Plan?

- 1. All emergencies shall be expected prior to its occurrence.***
- 2. Actions to be taken.***
- 3. Available resources.***
